

A bright new world of sounds
tailored to you

widex  Inteo™
Integrated Hearing Science

WIDEX®
high definition hearing

**Rediscover your world
with your sound**

By the time you realise you have a hearing loss, you have probably become used to a quieter world. Everyday sounds – such as bird song or rustling leaves – have slowly disappeared and you find it increasingly difficult to engage in conversations.

These are the things you can expect a hearing aid to improve. But with Inteo, you can expect much more!

Developed by Widex – the undisputed technology leader in the hearing aid industry – Inteo is the most advanced hearing aid in the world. It is the first hearing aid that constantly tailors the sounds of your life to your personal needs and wishes. Every day. Every hour. Every second.

If you want the best, you want Inteo.

- **Enjoy a more discreet hearing aid – without compromise**
- **Understand everything around you**
- **Get unrivalled speech understanding in noise**
- **Enjoy sounds you haven't heard in years**

**Enjoy a more discreet
hearing aid
- without compromise**

The invisible hearing aid hasn't been invented – yet!

But thanks to Inteo's unique active feedback cancelling system more people have the unique opportunity to choose a smaller hearing aid than they normally could - without compromising their need for amplification.

Another option is to choose the special élan version of Inteo – an open fitting that can give superior comfort and a natural representation of your own voice.

**Choose an open fitting
or a smaller hearing aid
without compromising
your hearing ability.**

**Understand everything
around you**

Keep your focus on important decisions at work – and let Inteo focus on the voice.

We all need to be able to communicate in a variety of situations, not only one-to-one conversations with the person in front of you. Inteo makes it easy to understand the person talking to you, even if they are behind you.

Inteo detects speech regardless of the location of the person talking, giving you the best basis for understanding everything around you. Only Inteo hearing aids give you this unique feature.

**Enjoy sounds you haven't
heard in years**

With extraordinarily clear and detailed reproduction of sound, Inteo brings long forgotten sounds back to you.

Even still, some sounds are so high-pitched that they are beyond your hearing range regardless of amplification. Does that mean they are lost forever? Not with Inteo.

Like binoculars bringing distant objects close, Inteo detects otherwise inaudible sounds and moves them into your audible range. Thus, Inteo brings high-pitched sounds, such as rustling leaves and bird song, back to you.

**Get unrivalled
speech understanding
in noise**

One of the main challenges for hearing aids is to provide clear speech in noisy environments. With Inteo, you will experience a demonstrably higher degree of speech understanding in noisy situations compared to other hearing aids.

So whether you are having a conversation in a car or a chat over a good cup of coffee in a crowded café, Inteo lets you enjoy the voice without being bothered by noise.

Inteo filters out unimportant sounds

It is **our mission**, through originality, perseverance and reliability, to develop high quality hearing instruments that give people with a hearing loss the same opportunities for communication as those with normal hearing.
